## COMPANY MISSION STATEMENT

GreenTech Solutions is committed to accelerating Malaysia's transition to renewable energy by developing innovative solar technology solutions that are affordable, efficient, and accessible to businesses of all sizes. We aim to reduce carbon emissions while promoting sustainable economic growth.

## BUSINESS DESCRIPTION

GreenTech Solutions specializes in the design, installation, and maintenance of commercial solar energy systems for small and medium enterprises across Malaysia. Our proprietary solar panel monitoring technology increases efficiency by 22% compared to standard installations, allowing businesses to significantly reduce energy costs while minimizing their environmental impact. Our services include energy consumption audits, customized solar system design, turnkey installation, and ongoing maintenance with real-time monitoring. We primarily serve the manufacturing, hospitality, and retail sectors, with a growing presence in agricultural applications. Since our founding in 2019, we have completed over 45 installations throughout West Malaysia, with plans to expand to East Malaysia in the coming year. Our team includes certified renewable energy engineers, installation specialists, and customer support professionals dedicated to helping businesses reduce their carbon footprint and energy costs.
